

Please deny Bellsouth's petition to end broadband regulation. Thanks to the regulation, I am able to obtain superior service and quality from an independent Internet Service Provider. The current regulation promotes competition for internet access among a variety of service providers.

Bellsouth's specialty is providing telecommunication lines due to their former monopoly status. Bellsouth is neither proficient nor interested in providing competitive internet services to residential and commercial customers. Eliminating the regulation will crush innovation and competition for end-user service in the industry.
